Language students often need individual attention from the teacher. Now there's patented MONI-COM II to help with classroom tutoring. An exclusive feature allows as many as 40 students per console to be monitored. Each student can be helped without embarrassment or disturbing others . . . even the student's program and responses can be recorded for playback. MONI-COM II broadcasts up to six different lessons at one time to students wearing 6-channel receiver/headsets with microphones. Because the system is wireless, there's unprecedented flexibility in room usage and seating. The compact 26" x 18" x 8" console is easily portable. For a free, no-obligation demonstration in your school, contact P/H Electronics . . . also manufacturers of 2 to 12-channel one-way wireless systems for the classroom and instructional media centers.
