As teachers and professionals, many language laboratory directors are often asked to either evaluate or to help in the evaluation of tape programs for existing or newly established courses. The following questionnaire was designed to help me quantify my evaluation and to provide a set of self-questions guiding the formulation of my opinion of a particular tape series. I find the checklist to be especially helpful as a reference/data sheet for future use. Such information is often useful for teachers who find they must now teach a particular text and are not familiar with the accompanying tape series. In addition, the cataloguing of tapes becomes more complete with a quick, but meaningful reference evaluation close at hand.
