Learn Contact French™ in the Paris Classroom with Professor John Rassias. CBS/FOX VIDEO proudly announces CONTACT FRENCH, a new ten-lesson videocassette language series starring the incomparable Professor John Rassias of Dartmouth College. Watch as Rassias portrays Napoleon, Diderot, a concierge, a master chef, and a host of other French characters! CONTACT FRENCH concentrates on dramatic elements, a high level of energy, and constant participation on the part of students and teachers. The Rassias Method of teaching French is so effective that hundreds of colleges and high schools are now using it to motivate students, encourage communication in French and enhance appreciation of French culture. And best of all, it's done in Paris! Your students will discover that learning French with the aid of CONTACT FRENCH is fun, fast paced, and totally involving! Use the video and written materials as tools for group learning, to help students learn at their own pace, and to reinforce your text/language approach. Make the Rassias Method work for you and your students with CONTACT FRENCH. For more information call or write: CBS/FOX VIDEO 23705 Industrial Park Drive, Farmington Hills, Michigan. Call 1-800-824-8889 toll-free or in Michigan call (313) 471-6000.

2 ECONOMY. Since the educator specifies what functions to incorporate into the lab, the cost does not include hardware that is unwanted. Another reason lending to the economy of Califone labs is the fact that Level II, III and IV can be expanded at any time using high-quality Califone modules. Level II can have a record mode added to take it to Level III. And Level III labs can have an additional video system added to convert to Level IV. You install only the equipment you need and expand at your own pace.

Four Levels with up to

1 FLEXIBLE. Custom designing of learning laboratories is the practice rather than the exception at Califone. Equipment is designed to meet the needs of the educator. All Califone learning laboratories are designed for ease of expansion up to Level 4 and can be remote controlled at all levels. Classroom sessions with up to ten master programs and 48 student recorders can be remotely controlled by the instructor at the push of a button. In the absence of the instructor, individual study is possible with library mode and manual function of the students’ recorders.

Learn

3 EXPERIENCE. Califone has been manufacturing learning laboratories for over thirty years. Working with educators for this long is the reason why Califone labs are designed the way they are. Mobile or fixed position labs with easy to understand consoles for instructors, multi-program capability, student booths, optimum audio quality and ease of operation are just a few of the features that can make Califone Learning Laboratories tailored to your needs.

Ten Master Programs.

4 SERVICE. Califone Learning Laboratories are backed and serviced by a national network of learning lab service professionals. If there is ever a problem with the lab, there is a Califone serviceperson close by. When a Califone is installed you are left with more than just an operators manual. Knowing that quick on-site repairs and maintenance are a phone call away leaves the educator with more time to teach.

Over the years Califone has listened and learned from its customers. We would like to hear from you regarding your needs. If you would like a marketing representative to call or would like a free brochure give us a call at 213/870-9631 or write: Califone International, 5922 Bowcroft St., Los Angeles, CA 90016.
